ABOUT ME

I am a skilled professional with expertise in both data analysis and generative AI. As a data analyst, I specialize in extracting insights from data to drive business decisions, utilizing tools like Python and SQL. In generative AI, I excel at creating intelligent systems that produce creative content autonomously, using advanced techniques like GANs and VAEs. With a focus on clear communication and innovation, I thrive in dynamic environments where analytical rigor is valued.

COURSES

- Prompt Engineer at BE10X
